

WHAT IS HOSPICE ?

Hospice is a special kind of care for patients and families facing a life-limiting illness. At the center of hospice is the belief that each of us has the right to die pain-free and with dignity, and that our families will receive the necessary support to allow us to do so. Hospice:

- Treats the physical, emotional, and spiritual needs of those they serve.
- Provides care in the patient's home, or in a home-like setting.
- Supports family and caregivers by offering counseling, training and information.
- Helps patients live pain-free and as comfortable as possible to ensure the best possible quality of life.
- Provides supplies, medicines and equipment needed to maintain quality of life.
- Hospice offers choices and honors the wishes of the patient.

HOW HOSPICE WORKS?

Hospice offers high quality, compassionate care to persons who can no longer benefit from curative treatment. The typical hospice patient has a life expectancy of six months or less.

Services are provided by a team of trained professionals that includes: Physicians, Nurses, Counselors, Social Workers, Therapists, Chaplains, Aides, and Volunteers.

The patient is usually referred to hospice by their primary physician but referrals can also be made by family members, friends, clergy, or health professionals.

WHAT MAKES HOSPICE DIFFERENT?

Hospice care can dramatically and positively impact quality of life. The goal is to empower the individual by providing knowledge and information, to facilitate decision-making. Our clinical staffs are experts on pain control and symptom management. They are committed to education of patients and caregivers. Counseling and spiritual support is available to the patient as well as the family member.

WHO ARE ELIGIBLE FOR HOSPICE CARE?

Recipients of Services:

- Live within our geographic boundaries.
- Have a life threatening illness and seek comfort and palliative care.
- Have a Physician of record.

ADMISSIONS PROCESS

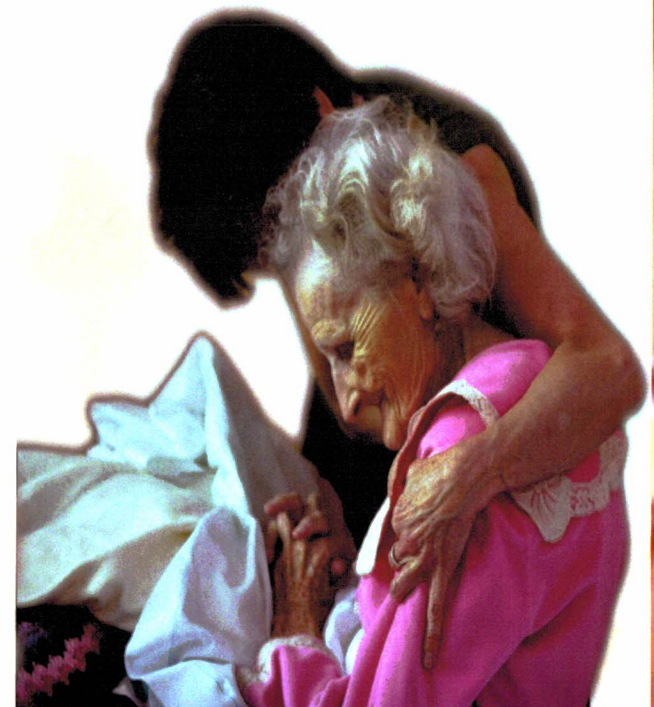

Admitting a patient to the hospice program is a simple process for the: physician, discharge planner, social worker, family member or caregiver. Just call the hospice and a staff will arrange to meet the patient/family for the explanation of the hospice benefits. Once the eligibility is determined, all hospice services requested will be provided immediately.
